1- Computers and Information Technology Department

The Department of Computers and Information Technology expresses the industry information and is divided into four branches, namely Technical Computer Service, Network Management, Web Programming and Database Programming. In 11th grade every Computers and Information Technology student chooses one of the above mentioned branches and continues their education specializing in their chosen branch. Therefore, students become experts in their respective branch.

2. Office management and executive assistance department

With the rapidly developing technology Office management has become one of the indispensable parts of all sectors. This fast growing profession in line with technology continues to evolve and change at the same speed. It doesn't seem so possible to see how much the office management which evolves from stenox and telex to paperless offices will change and evolve.

Office management is a department where education which aims to bring proficiencies of legal secretariat , trade secretariat, executive secretariat is given .

3. Child development and education department

In the century we lived in, the countries need people who are well-trained, equipped, contented, compassionate, responsive, able to think, able to decide and in love with their countries. Therefore it is needed to create a good and healthy education environment. In order for the education to reach the desired level, plan and schedule in a quality determined in accordance with the environment and current conditions should be prepared.

Nowadays in addition to early childhood education, rapid expansion of special education institutions has caused a great need in this sector. Inclusion of program development studies of Child development and education department and in this framework modular based preparation of programs based on sector analysis are very important for the education of the people of our country. It will bring a new horizon to the Vocational and technical education system which trains Intermediate staff for this sector.

Child development and education is a department where education which aims to bring proficiencies of early childhood education and special education is given.

4. The Department of food technology

Food industry is very important for economic development since it has big contributions to population, employment, nutrition, raw materials and export. It is obvious that this role will increase in the future. There are two main branches in the Department of food technology; which are food quality control and food processing. In this department students are educated about professional development, food microbiology, fundamental changes in matter and their measurements, food chemistry, and knowledge, skills and competencies related to laboratory technique. Moreover in the food quality control field they are educated about quality control analysis in food, microbiological analysis in food, meat products processing, vegetable and fruit processing, cereal products technology, food production technologies, physical and sensory analysis in food, food packaging and control, nutrition and food security.

5. Graphics and Photography Department

With the graphics and photography department, firstly besides giving knowledge and skills, which includes fundamental information, it is aimed to bring abilities; human relations which are a necessity for our age, communicating, adaptability to changes and technology, understanding and using the systems. The general aim of the program is to ensure that the individuals are equipped with fundamental professional knowledge and skills on fundamental abilities. With the professional knowledge and skills gained; It is aimed to raise individuals who can provide quality service in line with the expectations of the sector, who have a conscience towards the environment and society, who can act on the thoughts of starting their own business with the consciousness of unity of power, and who know the necessity of being responsible for quality at all stages of the business.

6. Food And Beverage Service Area

The developments in the tourism sector have increased its share in national income and turned it into an important employment area.

The positive contribution of tourism revenues to the balance of payments and the ability to attract foreign capital to the country clearly reveal the importance of the sector.

In addition to the developments in the tourism sector, social-cultural and economic changes in the society accelerated its development in the field of food and beverage services, making it an important employment area.

In a rapidly changing world, quality manpower, which has gained the competencies required by the industry in order to keep up with the competitive conditions of the field of food and beverage services, is one of the targets of our field.
